

21st International Conference on Human-Computer Interaction Walt Disney World Swan and Dolphin Resort Orlando, Florida, USA 26 - 31 July 2019

http://2019.hci.international/

ADVANCE CALL FOR PARTICIPATION

HCI-CPT 2019

1st International Conference on HCI for Cybersecurity, Privacy and Trust

Jointly held under one management and one registration with HCI International 2019

Chair: Abbas Moallem

Board Members

MOHD ANWAR, United States, | BUDI ARIEF, United Kingdom | JORGE BERNAL BERNABE, Spain | WOJCIECH CELLARY, Poland | ULKU CLARK, United States | FRANCISCO CORELLA, United States | TAREK ELSALEH, United Kingdom | STEVEN FURNELL, United Kingdom | PAUL GRACE, United Kingdom | AQEEL KAZMI, Ireland | DAN KIM, United States | JORGE LANZA, Spain | NATHAN LAU, United States | KAREN LEWISON, United States | ALBENA MIHOVSKA, Denmark | GEORGE MOLDOVAN, Romania | JASON R C NURSE, United Kingdom | MARIA PAPADAKI, United Kingdom | HENRICH PÖHLS, Germany | SASCHA PREIBISCH, Canada | GERALD QUIRCHMAYR, Austria | KAZUE SAKO, Japan | BRITA SANDS BAYATMAKOU, United States | DAVID SCHUSTER, United States | RALF C. STAUDEMEYER, Germany | ELIAS TRAGOS, Ireland | ADAM WÓJTOWICZ, Poland | SHERALI ZEADALLY, United States

Submissions		Requirements & Deadlines	
Regular		Abstract length	Proposal deadline
	Papers ¹	800 words	12 October 2018
	Posters ¹	300 words	1 February 2019
	Demonstrations	300 words	30 April 2019
	Student Designs ²	300 words & video clip	12 April 2019
	¹ Submissions will be peer-reviewed by at least 2 independent referees from the International Program Boards ² A distinguished international committee will be the jury		
Invited	Papers	Process under the guidance of Parallel Session Organizers, open until camera-ready deadline by 1 February 2019	
Regular or Invited	Tutorials	Deliver a half-day tutorial regarding one of the Conference topics. Submit a 300 words abstract by 12 October 2018	

Conference proceedings published by

The Cybersecurity field, in all its dimensions, is exponentially growing, evolving and expanding. New security risks emerge with the continuous increase of Internet interconnections and the development of the Internet of Things. Cyberattacks endanger individuals and companies, as well as vital public services and infrastructures. Confronted with spreading and evolving cyber threats, organizations and individuals are falling behind in defending their systems and networks, and they often fail to implement and effectively use basic cybersecurity and privacy practices and technologies.

The 1st International conference on HCI for cybersecurity, privacy, and trust (HCI-CPT) intends to help, promote and encourage research in this field by providing a forum for interaction and exchanges among researchers, academics, and practitioners in the fields of HCI and cyber security. The Conference addresses HCI principles, methods and tools in order to address the numerous and complex threats which put at risk computer-mediated human-activities in today's society, which is progressively becoming more and more intertwined with and dependent on interactive technologies.

The related topics include, but are not limited to:

- Authentication and identification: Adaptive access control; Context-aware authentication and authorization; Frictionless authentication; Security and usability of combinations of authentication factors; Remote identity proofing; Privacy implications of authentication technologies; Obtaining informed consent in the federated login; Preservation of privacy in the federated login; Security and usability of derived credentials; Web of trust
- Biometrics: Privacy and security implications of biometric architectures; Detection of biometric presentation attacks; Emerging biometric modalities; Fusion of biometric modalities; Behavioral biometrics; Revocable biometrics
- Applications of cryptography to cybersecurity, privacy, and trust: Cryptographic authentication; Applications of anonymous credentials and group signatures; Identification with selective disclosure of attributes; Mitigation of fraudulent credential sharing; Usability of TLS client certificates; Usability of encrypted messaging; BYOK: Bringing your own key to the cloud
- Human factors: User acceptance of security and privacy technologies; Identification through peer-to-peer vouching; End-user best practices for malware avoidance; Mitigation of phishing attacks; Mitigation of social engineering attacks; Mitigation of insider threats; Behavior-based cybersecurity; Communication of security risks to end-users; Human identification of websites; Human detection of trusted execution; Non-repudiation and repudiability; Behavior-based cybersecurity; User awareness of privacy threats
- Cybersecurity, privacy and trust in computing areas: Web technologies; Mobile computing; Cloud computing; Enterprise computing; Peer-to-peer networking; Blockchains, distributed ledgers, and gossip protocols; Internet of Things; SCADA: Supervisory control and data acquisition; Ubiquitous computing; VR/AR systems
- Cybersecurity, privacy and trust in application areas: Electronic payments; Social networks; Smart cities; Connected Cars and Autonomous Driving; Smart home; Healthcare and patient monitoring; Wearables; Smart environments
- Legal, ethical, economic and societal issues in cybersecurity: Ethnic bias in face recognition accuracy; Trust frameworks; Tracking; Privacy by design & default; Fake news; Bots in social networks; Cyberwarfare; Attacks against elections; Surveillance; Money laundering and black markets; User privacy and data protection regulations; Big data impact on user privacy
